SUMMARY

A self-taught software developer and high school senior with experience in website development, game creation, application development, automation, bot development, and Roblox development. Proficient in Python, Java, JavaScript, Lua, C#, HTML, and web development, with experience learning C++ and React. Passionate about game development, software development, cybersecurity, and IT. Skilled in working individually and in teams through personal projects, hackathons, employment, and student organization leadership. Quick learner with interests in problem-solving, creating useful software, and learning new technologies.

EDUCATION

Loudoun County High School - Leesburg, Virginia
12th Grade Student | Expected Graduation: 2027
GPA: 3.5

TECHNICAL SKILLS

Programming Languages

- Python
- Java
- JavaScript
- Lua
- C#
- HTML/CSS
- Learning: C++, React

Development Areas

- Game Development
- Roblox Development
- Web Development
- Application Development
- Backend Development
- Automation & Bot Development
- Cybersecurity
- Database & API Development

Tools & Technologies
• GitHub /Git
• VS Code
• Roblox Studio
• Node.js
• React
• PostgreSQL
• Prisma
• Linux
• Raspberry Pi
• REST APIs

LEADERSHIP & ORGANIZATIONS

Chief Technology Officer - CSNHS
Loudoun County High School | 2026–Present
• Serve as Chief Technology Officer for CSNHS.
• Lead technology development and management for CSNHS.
• Developed a CSNHS website and web application.
• Developed backend APIs and a database for CSNHS.
• Implemented account creation, authentication, account activation, events, announcements, and user management.
• Manage deployment and hosting of the CSNHS web application on Linux.
• Configure web services, domains, HTTPS, DNS, and related infrastructure for CSNHS.
• Collaborate with CSNHS leadership to determine technological needs and develop solutions.
• Use GitHub and modern development tools to develop and maintain software for CSNHS.
• Diagnose and resolve issues involving software, servers, networks, and web applications.

PROJECTS

Personal Portfolio Website
• Designed and developed a personal portfolio website.
• Developed the website using HTML, CSS, and JavaScript.
• Displayed projects and technical skills in an organized portfolio.
• Updated the portfolio as new skills were learned and new projects were developed.

CSNHS Web Application
• Designed and developed a full-stack web application for Loudoun County High School's CSNHS.
• Developed a React frontend with a Node.js backend and PostgreSQL database.
• Implemented REST API endpoints for users, events, and announcements with authentication.
• Implemented role-based user permissions for different parts of the application.

• Implemented account activation for new users through activation links.
• Deployed the application to a Linux server using Caddy and PM2.
• Used PostgreSQL and Prisma to manage the application's database and data.
• Configured HTTPS, DNS, and domain routing for the application.
• Continue developing and maintaining the application for CSNHS.

Roblox Systems & Game Development

• Developed custom Roblox systems and gameplay mechanics using Lua.
• Developed interactive gameplay and scripts for reusable systems.
• Worked on systems for larger-scale and more complex game development projects.
• Debugged scripts and implemented new features and mechanics.

Custom Bots & Applications

• Developed automation tools, bots, and applications using Python and JavaScript.
• Developed bots and applications with an emphasis on functionality and reliability.
• Developed custom tools and applications for automating processes and tasks.
• Worked with APIs and external services when developing applications.

HACKATHON EXPERIENCE

Virginia CyberSlam 2026

• Competed in a cybersecurity and technology-focused hackathon.
• Collaborated with teammates to compete in cybersecurity and technology challenges.
• Used software development, problem-solving, and technical skills to overcome challenges.
• Worked in a fast-paced environment as part of a team.

Virginia CyberSlam 2025

• Competed in a cybersecurity and technology-focused hackathon.
• Collaborated with teammates to compete in cybersecurity and technology challenges.
• Developed problem-solving and technical troubleshooting skills through hands-on challenges.

Private AI & Satellite Imagery Hackathon - 2024

• Competed in a private AI and satellite imagery-focused hackathon.
• Collaborated with teammates to develop an AI model to predict the location of roads.
• Trained and utilized models to make predictions based on road size, vehicles, traffic, and time of year.
• Analyzed results and collaborated with teammates to improve the results and model.

WORK EXPERIENCE

Goldfish Swim School
Instructor / Team Member | 2026–Present

- Work in a customer-facing environment requiring communication and collaboration.
- Interact with children and parents while maintaining a professional and positive environment.
- Adhere to safety regulations, policies, and procedures while working.
- Communicate effectively with peers, supervisors, students, and parents.
- Prioritize responsibilities in a constantly changing and fast-paced work environment.
- Balance work, educational, technical, and extracurricular commitments.

Lifeguard - High Sierra Pools
May 2025 – September 2026 | Seasonal
- Maintained a safe environment for guests and responded to emergencies.
- Monitored large groups of guests while following safety procedures.
- Demonstrated responsibility and attention to detail in a safety-focused work environment. • Communicated effectively with guests, coworkers, and supervisors.
- Collaborated with coworkers to provide service to guests in a fast-paced work environment. • Managed multiple responsibilities while maintaining awareness of my surroundings.

CERTIFICATIONS

IT Specialist - Networking

ADDITIONAL EXPERIENCE

- Self-taughtsoftwaredeveloperwithexperience in game development, application development, and web development.
- Experienced with managing Linux and Raspberry Pi servers.
- Experienced with deploying and maintaining web applications.
- Experienced with databases, authentication, APIs, and server administration.
- Regularly learn new programming languages, technologies, and tools independently.
